

SERVING & CUTTING GUIDE

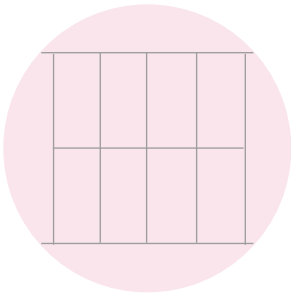

NOTES ABOUT SERVINGS:

This guide is for a serving of cake that is 1" x 2" by the height of the tier (typically 4" tall or more). This is traditionally a wedding serving, which if there is other food at your party, should be enough for each person.

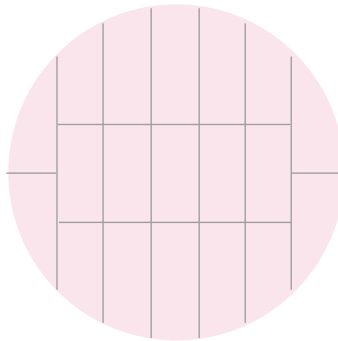

If the only food is cake, or you like larger pieces, then a 1.5" x 2" or even 2" x 2" serving size is best.

In some cases you'll see that a serving isn't the standard rectangle shape, such as the edge pieces. This is to ensure as little of the cake is wasted as possible. The non-standard rectangle serving will be approximately the same volume as a standard one.

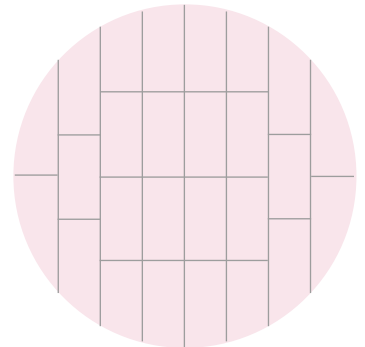

6" round
